

XM provides a wide array of musical choices and other services. If I want to listen to 5 minutes of commercials every 10 minutes for 30 minutes in order to hear traffic information I will listen to FM. But I pay for XM and I enjoy the ability, when I'm passing through Atlanta or another city that has the traffic weather coverage, to get that information promptly and accurately without having to listen to a bunch of garbage. It is my opinion that this premium broadcast service should be allowed to continue this excellent service which they provide their customers.
